

Week 2- Identity and Access Management(IAM)

Name- Aditya Pangavhane

PRN-2124UCSM2017

College Name- Sanjivani University

Email-Id- pangavhaneaditya51@gmail.com

- ❖ Task- 1) Create IAM users, groups, roles.
- 2) Apply least privilege principle.
- 3) Document policies and screenshots.

🔧 Steps Create IAM users, Groups, Roles.

1. Sign in to AWS Console, Go to: <https://aws.amazon.com/> , Sign in using your root user or IAM user.
2. Create IAM User, Go to IAM → Users → Click on Create user.

3. Enter the User name, Select AWS Management Console access, then check custom password and reset the password and click Next Button.

Week 2- Identity and Access Management(IAM)

Console password

☐ Autogenerated password
You can view the password after you create the user.

☒ Custom password
Enter a custom password for the user:

Must be at least 8 characters long
Must include at least three of the following sets of character types: uppercase letters (A-Z), lowercase letters (a-z), numbers (0-9), and symbols (!@#\$%^&*()_+-=){}[]|'`~.,;:~)

☐ Show password

☒ Users must create a new password at next sign-in - Recommended
Users automatically get the `IAMUserChangePassword` policy to allow them to change their own password.

1 If you are creating programmatic access through access keys or service-specific credentials for AWS CodeCommit or Amazon Keyspaces, you can generate them after you create this IAM user. [Learn more](#)

Activate Windows [Cancel](#) [Next](#)
Go to Settings to activate Windows.

4. Set the permission and then click the create group.

Set permissions
Add user to an existing group or create a new one. Using groups is a best-practice way to manage user's permissions by job functions. [Learn more](#)

Permissions options

☒ Add user to group
Add user to an existing group, or create a new group. We recommend using groups to manage user permissions by job function.

☐ Copy permissions
Copy all group memberships, attached managed policies, and inline policies from an existing user.

☐ Attach policies directly
Attach a managed policy directly to a user. As a best practice, we recommend attaching policies to a group instead. Then, add the user to the appropriate group.

1 **Get started with groups**
Create a group and select policies to attach to the group. We recommend using groups to manage user permissions by job function, AWS service access, or custom permissions. [Learn more](#) [Create group](#)

► **Set permissions boundary - optional**

[Cancel](#) [Previous](#) [Next](#)

5. Enter User group name, select the Permissions policies, and then click the create user group.

Create user group

Create a user group and select policies to attach to the group. We recommend using groups to manage user permissions by job function, AWS service access, or custom permissions. [Learn more](#)

User group name
Enter a meaningful name to identify this group.

Maximum: 128 characters. (No apostrophes and %*,&," characters)

Permissions policies (1/1050) [Create policy](#)

Filter by Type: All types 1 match

Policy name	Type	Used	Description
☒ AmazonEC2ReadO...	AWS managed	None	Provides read-only access to Amazon EC2 resources.

[Cancel](#) [Create user group](#)

Week 2- Identity and Access Management(IAM)

6. Click Create user button.

7. User Created Successfully.

8. Create Role, click Role Option.

Account settings

Week 2- Identity and Access Management(IAM)

9. Click Create role.

10. Then select Trusted Entity.

11. Select the use case EC2, and then click Next.

Week 2- Identity and Access Management(IAM)

12. Attach the policies AmazonS3ReadOnlyAccess and CloudWatchAgentServerPolicy and click next Button.

13. Give the Role details like name, Description.

Week 2- Identity and Access Management(IAM)

14. Select Trusted Entities and check the permission.

Step 1: Select trusted entities Edit

Trust policy

```
1- {
2-   "Version": "2012-10-17",
3-   "Statement": [
4-     {
5-       "Effect": "Allow",
6-       "Action": [
7-         "sts:AssumeRole"
8-       ],
9-       "Principal": {
10-        "Service": [
11-          "ec2.amazonaws.com"
12-        ]
13-      }
14-    ]
15-  }
16- }
```

Step 2: Add permissions Edit

Permissions policy summary

Policy name	Type	Attached as
AmazonS3ReadOnlyAccess	AWS managed	Permissions policy
CloudWatchAgentServerPolicy	AWS managed	Permissions policy

15. Successfully Role is Created.

Week 2- Identity and Access Management(IAM)

✚ Apply least privilege principle.

LimitedAccessGroup [info](#) [Delete](#)

Summary [Edit](#)

User group name: LimitedAccessGroup

Creation time: June 15, 2025, 15:51 (UTC+05:30)

ARN: [arn:aws:iam::355433852359:group/LimitedAccessGroup](#)

[Users](#) [Permissions](#) [Access Advisor](#)

Permissions policies (1) [info](#) [Simulate](#) [Remove](#) [Add permissions](#)

You can attach up to 10 managed policies.

Filter by Type: All types

Policy name	Type	Attached entities
AmazonEC2ReadOnlyAccess	AWS managed	1

Samruddhinik [info](#) [Delete](#)

Summary

ARN: [arn:aws:iam::355433852359:user/Samruddhinik](#)

Console access: [Enabled without MFA](#)

Access key 1: [Create access key](#)

Created: June 15, 2025, 15:33 (UTC+05:30)

Last console sign-in: [Never](#)

[Permissions](#) [Groups](#) [Tags](#) [Security credentials](#) [Last Accessed](#)

Permissions policies (1) [Simulate](#) [Remove](#) [Add permissions](#)

Permissions are defined by policies attached to the user directly or through groups.

Filter by Type: All types

Policy name	Type	Attached via
IAMUserChangePassword	AWS managed	Directly

EC2BasicRole [info](#) [Delete](#)

Allows EC2 instances to call AWS services on your behalf.

Summary [Edit](#)

Creation date: June 15, 2025, 15:43 (UTC+05:30)

ARN: [arn:aws:iam::355433852359:role/EC2BasicRole](#)

Instance profile ARN: [arn:aws:iam::355433852359:instance-profile/EC2BasicRole](#)

Last activity: -

Maximum session duration: 1 hour

[Permissions](#) [Trust relationships](#) [Tags](#) [Last Accessed](#) [Revoke sessions](#)

Permissions policies (2) [info](#) [Simulate](#) [Remove](#) [Add permissions](#)

You can attach up to 10 managed policies.

Filter by Type: All types

Policy name	Type	Attached entities
AmazonS3ReadOnlyAccess	AWS managed	1
CloudWatchAgentServerPolicy	AWS managed	1

Activate Windows
Go to Settings to activate Windows.
