[Complete sign up](#)

6. Create Account successfully.

Congratulations!

Thank you for signing up with AWS.

We are activating your account, which should take a few minutes. You will receive an email when this is complete.

[Go to the AWS Management Console](#)

[Sign up for another account](#) or [Contact Sales](#)

Week 1- Cloud Environment Setup

Step: Launch EC2 Instance on AWS

1. Login to AWS Console , Go to: <https://console.aws.amazon.com>
2. Go to the EC2 Dashboard

3. Launch an Instance

4. Configure Your Instance

Week 1- Cloud Environment Setup

5. Create or Select a Key Pair

Click Create key pair and it will download a .pem file to your computer — keep this file safe for SSH login.

Week 1- Cloud Environment Setup

6. Configure Network Settings

7. Launch

8. ES2 Instance Launch Successfully .

9. Open PowerShell or Git Bash on your Windows system, navigate to the folder where your .pem key file is saved and run following command.

Week 1- Cloud Environment Setup

```
PS C:\Users\Shree\Downloads> C:\Users\Shree\Downloads\Mykeypair.pem
PS C:\Users\Shree\Downloads> ssh -i C:\Users\Shree\Downloads\Mykeypair.pem ec2-user@16.170.242.131
The authenticity of host '16.170.242.131 (16.170.242.131)' can't be established.
ED25519 key fingerprint is SHA256:WIqa0pr+OdL11Auqix/edcCcDM55sB+4sRFcmVSTZY4.
This key is not known by any other names.
Are you sure you want to continue connecting (yes/no/[fingerprint])? yes
Warning: Permanently added '16.170.242.131' (ED25519) to the list of known hosts.
